PACKAGE DESCRIPTION

This package contains the complete set of tables of feasible combinations of
type A and B for up to four values from the E12 series, as described in the
common read-me file. Moreover, for three values, combinations of type C and D
are also included.

These tables, together with some accompanying files, are all contained in the
folder 'E12_Combinations'. In particular, this folder should contain the fol-
lowing twelve files:

- E12_Read_Me.pdf
- E12_Read_Me.txt

- E12_Combinations_2_A.txt
- E12_Combinations_2_B.txt
- E12_Combinations_3_A.txt
- E12_Combinations_3_B.txt
- E12_Combinations_3_C.txt
- E12_Combinations_3_D.txt
- E12_Combinations_4_A.txt
- E12_Combinations_4_B.txt

- GNU_GPL_V3.txt
- GNU_LGPL_V3.txt

The read-me file is included in PDF and in text form, for convenience. The
individual tables are stored in text files that have systematically coded file
names of the form:

- E12_Combinations_<n>_<type>.txt

<n> specifies the (maximum) number of values used in a combination and <type>
the type of combinations (see the common read-me file).

Each of these files also contains information about its original size in bytes,
and it is recommended to cross-check this if a problem with one of the files is
encountered, before contacting the author.

The last two files are the GNU General Public License (GPL) and the GNU Lesser
General Public License (LGPL). These files contain the detailed license agree-
ments under which the accompanying tables are being released.

All text files included in this package are Unix plain text files which use
single line-feed (LF) characters as line terminators; the various tables also
assume a fixed tab spacing of eight characters. Thus, a monospaced font and
proper tab settings are recommended for best readability. On Windows, it may be
necessary, too, to replace LF with CR LF (which will increase the file sizes),
or to use a compatible text viewer or editor.
