PACKAGE DESCRIPTION

This package contains the complete set of tables of feasible combinations of type A and B for up to five values from the E6 series, as described in the common read-me file. Moreover, for three values, combinations of type C and D are also included.

These tables, together with some accompanying files, are all contained in the folder 'E6_Combinations'. In particular, this folder should contain the following fourteen files:

- E6_Read_Me.pdf
- E6_Read_Me.txt

- E6_Combinations_2_A.txt
- E6_Combinations_2_B.txt
- E6_Combinations_3_A.txt
- E6_Combinations_3_B.txt
- E6_Combinations_3_C.txt
- E6_Combinations_3_D.txt
- E6_Combinations_4_A.txt
- E6_Combinations_4_B.txt
- E6_Combinations_5_A.txt
- E6_Combinations_5_B.txt

- GNU_GPL_V3.txt
- GNU_LGPL_V3.txt

The read-me file is included in PDF and in text form, for convenience. The individual tables are stored in text files that have systematically coded file names of the form:

- E6_Combinations_<n>_<type>.txt

<n> specifies the (maximum) number of values used in a combination and <type> the type of combinations (see the common read-me file).

Each of these files also contains information about its original size in bytes, and it is recommended to cross-check this if a problem with one of the files is encountered, before contacting the author.

The last two files are the GNU General Public License (GPL) and the GNU Lesser General Public License (LGPL). These files contain the detailed license agreements under which the accompanying tables are being released.

All text files included in this package are Unix plain text files which use single line-feed (LF) characters as line terminators; the various tables also assume a fixed tab spacing of eight characters. Thus, a monospaced font and proper tab settings are recommended for best readability. On Windows, it may be necessary, too, to replace LF with CR LF (which will increase the file sizes), or to use a compatible text viewer or editor.
